You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati outherity to use a drug called freezone, which the moment a few drops are applied to any corn, the soreness is relieved and soon the entire corn, root and all, lifts right out with the fingers, without one particle of pain.

This freezone is a sticky substance which dries the moment it is applied and just loosens the corn without infaming or even irritating the surrounding tissue or skin. He says a quarter of an ounce will cost very little at any of the drug stores, but this is sufficient to rid one's feet of every hard or soft corn or callus. You reckless men and wemen who
